PROFESSIONAL SUMMARY

Results-driven Full-Stack Developer with 1.5+ years of hands-on experience building production web applications, AI-powered platforms and browser extensions. Currently core contributor to Devsloop Nexus, a multi-tenant AI customer-engagement SaaS built on Next.js 16, React 19, TypeScript and Supabase/PostgreSQL — owning features end-to-end across RAG retrieval pipelines, LLM integration, role-based access control and row-level tenant isolation. Previously delivered frontend and NestJS backend features for Smodin (~1M monthly users, 100+ languages) and accessible UI for EasyLlama (3.8M+ learners). Strong focus on clean architecture, data security and test coverage.

TECHNICAL SKILLS

Front End: React.js, Next.js (App Router, Server Actions), TypeScript, JavaScript, Tailwind CSS, SCSS, Bootstrap, Recharts

Back End: Node.js, NestJS, Express.js, Socket.IO, Server Actions, REST APIs, Zod

Database: PostgreSQL, Supabase, MongoDB, MySQL, Firebase, pgvector, Row-Level Security (RLS)

AI / LLM: Anthropic Claude API, Ollama, RAG, Vector Embeddings & Semantic Search, Prompt Engineering, LLM Guardrails

DevOps & Tools: Git, GitHub, Bitbucket, Docker, Jenkins, GitHub Actions, Vitest, Postman, Supabase CLI, Plasmo (Chrome Extensions)

WORK EXPERIENCE

Associate MERN Stack Developer | [Devsloop Technologies](#)

July 2025 – Present

- Core contributor to Devsloop Nexus, a multi-tenant AI customer-engagement SaaS, owning features end-to-end from database migration and RLS policy through server action, RBAC gate and UI.
- Integrated LLM capabilities in production — RAG retrieval, streaming chat, structured intent classification and prompt guardrails against injection and off-topic leakage.
- Set up and maintained the Docker/Jenkins staging deployment pipeline and self-hosted cron jobs for background knowledge indexing.
- Contributed to the development of Smodin, an AI-powered content generation and detection platform supporting 100+ languages and serving close to 1 million monthly users globally.
- Developed key frontend features using React.js and Next.js, improving overall platform UX and responsiveness.
- Built and maintained backend services using NestJS, including RESTful API endpoints and service modules.
- Engineered a Chrome Extension using Plasmo that captures selected browser text and delivers AI-based detection and humanization features through backend API integration.
- Collaborated with cross-functional team members to deliver production-ready features in an Agile environment.

MERN Stack Developer Intern | [Devsloop Technologies](#)

March 2025 – July 2025

- Assisted in building full-stack features across the MERN stack under senior developer mentorship.
- Developed and integrated frontend UI components with backend REST APIs.
- Gained hands-on experience in real-world development workflows, Git branching, and code review processes.

Frontend / MERN Developer | [Eizitech Software House](#)

Feb 2025 – March 2025

- Designed and implemented responsive user interfaces using React.js, Tailwind CSS, and Bootstrap.
- Developed and integrated RESTful APIs using Node.js and Express.js.
- Contributed to end-to-end feature development across multiple client projects.

PROJECTS

Devsloop Nexus — Multi-Tenant AI SaaS Platform

(Ongoing)

- Core contributor to a multi-tenant AI customer-engagement platform built with Next.js 16 (App Router, Server Actions), React 19, TypeScript, Supabase (PostgreSQL/Auth/Storage) and Tailwind CSS v4, delivering an embeddable AI chat widget and an internal admin dashboard.
- Built a RAG knowledge pipeline — PDF/DOCX ingestion, document chunking, pgvector embeddings and hybrid lexical + vector retrieval — so every AI response is grounded in the tenant's own content.
- Integrated LLMs in production through a provider-agnostic layer over the Anthropic Claude API, with response streaming, intent classification and prompt guardrails.
- Implemented multi-layer tenant isolation using route middleware, an RBAC permission matrix and PostgreSQL Row-Level Security, and delivered AI lead capture, live agent takeover and tenant analytics features end-to-end.

EasyLlama

- Building responsive, accessible UI components for EasyLlama, a compliance training platform serving 3.8 million+ learners across 8,000+ organizations with a 94% learner satisfaction rate.
- Collaborating with the team to develop scalable frontend architecture for an ongoing client project.

Smodin — AI Content Platform & Chrome Extension

- Contributed to a production-level AI platform for content generation and plagiarism detection, supporting 100+ languages and close to 1 million monthly users globally.
- Built a Chrome Extension that captures selected browser text, calls backend APIs, and returns AI-generated results inline.
- Developed backend modules and controllers using NestJS and contributed to frontend with React.js and Next.js.

RapidChat — Real-time Chat Application

- Designed and built a real-time messaging system supporting instant messaging and group conversations using Socket.IO.
- Developed an intuitive, responsive frontend with React.js and implemented backend services with Node.js and Express.js.

VCart — E-commerce Platform

- Developed a fully functional e-commerce application using React.js, Node.js, Express.js, MySQL, and Stripe for payment processing.
- Built RESTful APIs, managed relational database schemas, and integrated a complete checkout and payment flow.

EDUCATION

BS Computer Science | University of the Punjab, Gujranwala

Sep 2020 – June 2024

CGPA: 3.37 / 4.00
